Protect. Transform. Sustain.

Online Learning Focused on Outcomes

Whether you are looking to align learning to operational skill gaps, develop remote employees around the globe, or grow the capabilities of your workforce, dss+ online learning solutions can help accelerate key business outcomes. Having the proper mix of award-winning content, world-class technology, and enhanced services delivered in the flow of work can help increase user engagement and the speed of capability building.

At dss+, our goal is to provide clients with robust, scalable, digital solutions to meet today's and tomorrow's learning challenges, including:

- A comprehensive multi-lingual library of award-winning, video-rich content with 800+ mobile-friendly, interactive and customizable courses.
- A world-class LMS that is simple to use, streamlines administration, and engages learners at scale.
- Enhanced management services designed to support implementation, adoption and management of enterprise-wide learning.

eLearning Courses

Drive learning consistency and knowledge transfer while increasing reach and engagement across your organization with the dss+ libraries of safety, compliance, and maintenance & reliability courses.

Our online learning courses offer:

- Award-winning content development
- Leading adult learning & instructional design principles
- High-quality production
- Global industry experts
- Affective communication (reaching the mind through the heart)

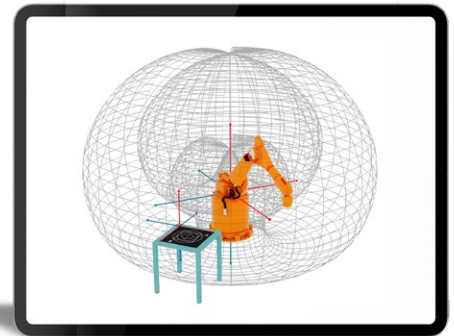

dss+ / Learning Management System™

Our new learning management system powered by SAP Litmos, features significantly expanded capabilities to further enhance our industry-leading learning and development services and content.

The cloud-based system helps learning leaders, training teams, and safety managers deliver, build, and report on dss+, 3rd party, and internally built online courses, with the ability to schedule and track instructor-led courses too. The highly secure and GDPR compliant application is universally accessible, easy to deploy and integrate, and features robust reporting and monitoring.

Our LMS features include:

- A welcoming, easy-to-navigate learner experience
- Responsive design accessible from any device
- Simplified learning administration and content management including the ability to schedule, track, and report on compliance training
- Robust and flexible reporting
- Built-in course creation, assessment, and survey tools
- Social learning and gamification features with badging and leaderboards
- Learning Record Store (LRS) and xAPI compliance
- Over 30 packaged integrations (such as Zoom and MS Teams) available for clients to connect to existing technology
- Management of instructor-led training
- Mobile app available to support learning in the flow of work
- Multilingual user interface for use around the globe

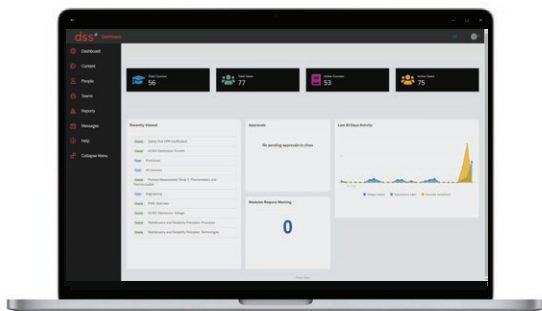

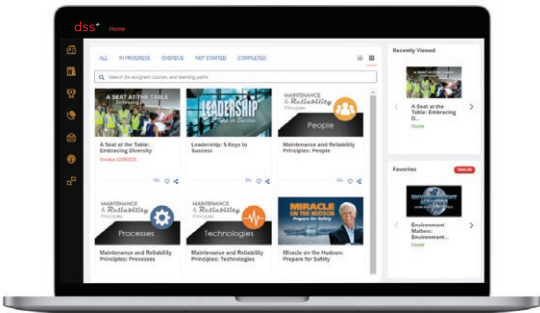

Enhanced Services

The dss+ team of technical consultants and systems experts will ensure that your digital learning systems enable achievement of both business and learning goals.

Our enhanced service offerings include:

- LMS advisory services to guide alignment of your system with learning and business requirements
- Assistance with system integrations to support increased automation around learning processes and data management
- Virtual training to ensure system managers are fully capable to administer learning

Training professionals worldwide have implemented dss+ digital learning solutions to help employees develop critical skills and competencies. Our consultants, technologists, and instructional experts are passionate about creating engaging and effective learning experiences, drawing on decades of real-world experience to foster meaningful transformation.
