Delivering actionable data that can lead to improved safety and operational performance

STOP® DataPro® is a secure web-based application – accompanied by a new mobile app – that makes it easy to record and analyze safety performance data gathered on the STOP® observation checklists. The insights derived from STOP® DataPro® provide actionable knowledge that can help lead to better workplace safety decisions and improved safety and operational performance.

The latest version of STOP® DataPro® represents a dynamic overhaul of the system. From a fresh new look and feel, to expanded tracking functionality and a brand-new reports module, the entire application has been redesigned to improve the user experience.

Reports can be used to:

- Identify safe and unsafe trends.
- Help keep employees focused on safety.
- Prioritize areas for safety improvement.
 - » "We need training on this topic."
 - » "We need to re-evaluate our procedures when operating this equipment."
 - » "We need to raise awareness of this potential hazard/risk."
- Create and track "corrective actions" identified in observations.
- Determine if unsafe observations are systemic or isolated instances.

THE STOP® SAFETY CYCLE

STOP® Observation Checklist

Unsafe	Safe	Unsafe	Safe
Reactions of People	Actions	Personal Protective Equipment (PPE)	Tools and Equipment
- Adjusting Personal Protective Equipment - Changing Position - Rearranging Job	- Head-to-Toe Check - Head - Eyes and Face - Respiratory System - Arms and Hands - Trunk - Legs and Feet	- Head-to-Toe Check - Head - Eyes and Face - Respiratory System - Arms and Hands - Trunk - Legs and Feet	- Right for the Job - Used Correctly - In Safe Condition

STOP® Safety Observation Card

Reactions of People	Personal Protective Equipment (PPE)
- Adjusting Personal Protective Equipment - Changing Position - Rearranging Job - Stopping Job - Attaching Grounds - Performing Lockouts	- Head-to-Toe Check - Head - Eyes and Face - Ears - Respiratory System - Arms and Hands - Trunk - Legs and Feet
Positions of People	Tools and Equipment
Injury Causes - Striking Against or Being Struck by Objects - Caught In, On, or Between Objects - Falling - Contacting Temperature Extremes - Contacting Electric Current - Inhaling, Absorbing, or Swallowing a Hazardous Substance - Repetitive Motions - Awkward Positions/Static Postures	Are They - Right for the Job - Used Correctly - In Safe Condition Procedures Are They - Available - Adequate - Known - Understood - Followed Housekeeping Standards - Known - Understood - Followed

STOP00-CRD-ENG-0005

Benefits of STOP® DataPro®:

- Rapid feedback on the observation process is available through automatic integration of safety observation data into reports.
- Secure and confidential database protects safety observation data, customer information and reports.
- Improve safety communication through reports that increase awareness of workplace safety issues.
- Prevent potential injury through trend observation and corrective actions.

Corrective action data and reports

Corrective action requests can be tracked to completion and are exclusive to each subscriber.

Corrective Action Planned

Investigate providing a better place to store the equipment while using this machine. Preferably one where they didn't have to reach awkwardly for the equipment.

Corrective Action Performed

Built a shelf to hold the equipment behind the operator position.

Use the mobile app to record and upload your observation data

- Capture safety observations using your iOS or Android device
- Use your company's custom checklists
- Save time and reduce use of paper checklists
- Edit observations at any time prior to syncing
- Sync observations into the authorized approval queue in STOP® DataPro® via WiFi or data connection

There are two options available to track the vital data you receive from the STOP® formal observation checklist, the Single Site License and the Enterprise Site License.

Single site license

The single site license is designed for a single operating site or location and includes one super administrator user per site and unlimited access to an unlimited number of users. This license allows access to one STOP® Program and Observation Checklist, basic site reporting package and technical support services. Custom checklists will cost an additional fee. This subscription is designed for use at one site with unlimited access to the software by any number of users. The mobile application is included with license.

STOP® DataPro® enterprise site license

The enterprise site license allows for an unlimited number of sites operated by a single company (may include more than one region). It includes two super administrators per license, one site administrator and one custom checklist per site, no limit on the number of accesses to the system for data entry, and a reporting specialist in each region. The mobile application is included with the enterprise site license.

STOP® is now available in the following languages:

Czech
English
French (European)
German
Italian
Japanese
Mandarin (simplified)
Polish
Portuguese (Brazilian)
Spanish (European)
Spanish (Latin America)
