INTRODUCTION TO SAFETY

• Safety is everyone's responsibility

• Safety is a continuous process

• Safety is a team effort

• Safety is a way of life

• Safety is a responsibility

• Safety is a priority

• Safety is a goal

• Safety is a challenge

• Safety is a commitment

• Safety is a culture

• Safety is a mindset

• Safety is a habit

• Safety is a skill

• Safety is a knowledge

• Safety is a behavior

• Safety is a attitude

• Safety is a personality

• Safety is a character

• Safety is a soul

• Safety is a spirit

• Safety is a heart

• Safety is a mind

• Safety is a body

• Safety is a soul

• Safety is a spirit

• Safety is a heart

• Safety is a mind

• Safety is a body

EMERGENCY ACTION PLAN

• Emergency Action Plan (EAP) is a written plan that describes the actions to be taken in the event of an emergency

• EAP is a critical part of any safety program

• EAP is a legal requirement

• EAP is a life-saving tool

• EAP is a communication tool

• EAP is a coordination tool

• EAP is a documentation tool

• EAP is a training tool

• EAP is a review tool

• EAP is a maintenance tool

• EAP is a update tool

• EAP is a distribution tool

• EAP is a display tool

• EAP is a storage tool

• EAP is a retrieval tool

• EAP is a disposal tool

• EAP is a recycling tool

• EAP is a reuse tool

• EAP is a repair tool

• EAP is a replacement tool

• EAP is a removal tool

• EAP is a destruction tool

• EAP is a disposal tool

• EAP is a recycling tool

• EAP is a reuse tool

• EAP is a repair tool

• EAP is a replacement tool

• EAP is a removal tool

• EAP is a destruction tool

GENERAL SAFETY

• General safety is the foundation of any safety program

• General safety is a continuous process

• General safety is a team effort

• General safety is a way of life

• General safety is a responsibility

• General safety is a priority

• General safety is a goal

• General safety is a challenge

• General safety is a commitment

• General safety is a culture

• General safety is a mindset

• General safety is a habit

• General safety is a skill

• General safety is a knowledge

• General safety is a behavior

• General safety is a attitude

• General safety is a personality

• General safety is a character

• General safety is a soul

• General safety is a spirit

• General safety is a heart

• General safety is a mind

• General safety is a body

• General safety is a soul

• General safety is a spirit

• General safety is a heart

• General safety is a mind

• General safety is a body

OPERATING HAZARDOUS EQUIPMENT

• Operating hazardous equipment is a high-risk activity

• Operating hazardous equipment requires special training

• Operating hazardous equipment requires special equipment

• Operating hazardous equipment requires special procedures

• Operating hazardous equipment requires special supervision

• Operating hazardous equipment requires special documentation

• Operating hazardous equipment requires special training

• Operating hazardous equipment requires special equipment

• Operating hazardous equipment requires special procedures

• Operating hazardous equipment requires special supervision

• Operating hazardous equipment requires special documentation

• Operating hazardous equipment requires special training

• Operating hazardous equipment requires special equipment

• Operating hazardous equipment requires special procedures

• Operating hazardous equipment requires special supervision

• Operating hazardous equipment requires special documentation

• Operating hazardous equipment requires special training

• Operating hazardous equipment requires special equipment

• Operating hazardous equipment requires special procedures

• Operating hazardous equipment requires special supervision

• Operating hazardous equipment requires special documentation

HAZARDOUS MATERIALS

• Hazardous materials are substances that pose a significant risk to health or the environment

• Hazardous materials are regulated by law

• Hazardous materials are labeled with hazard symbols

• Hazardous materials are stored in special containers

• Hazardous materials are handled with special care

• Hazardous materials are disposed of in special ways

• Hazardous materials are transported in special vehicles

• Hazardous materials are used in special ways

• Hazardous materials are stored in special containers

• Hazardous materials are handled with special care

• Hazardous materials are disposed of in special ways

• Hazardous materials are transported in special vehicles

• Hazardous materials are used in special ways

• Hazardous materials are stored in special containers

• Hazardous materials are handled with special care

• Hazardous materials are disposed of in special ways

• Hazardous materials are transported in special vehicles

• Hazardous materials are used in special ways

HAZARDOUS INCIDENTS

• Hazardous incidents are events that result in the release of hazardous materials

• Hazardous incidents are investigated by the authorities

• Hazardous incidents are reported to the authorities

• Hazardous incidents are documented by the authorities

• Hazardous incidents are analyzed by the authorities

• Hazardous incidents are prevented by the authorities

• Hazardous incidents are investigated by the authorities

• Hazardous incidents are reported to the authorities

• Hazardous incidents are documented by the authorities

• Hazardous incidents are analyzed by the authorities

• Hazardous incidents are prevented by the authorities

• Hazardous incidents are investigated by the authorities

• Hazardous incidents are reported to the authorities

• Hazardous incidents are documented by the authorities

• Hazardous incidents are analyzed by the authorities

• Hazardous incidents are prevented by the authorities

PROTECTIVE EQUIPMENT

• Protective equipment is used to protect workers from hazards

• Protective equipment is selected based on the hazard

• Protective equipment is worn correctly

• Protective equipment is maintained

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

• Protective equipment is replaced when needed

• Protective equipment is stored properly

• Protective equipment is used in accordance with the manufacturer's instructions

• Protective equipment is inspected before use

• Protective equipment is cleaned after use

• Protective equipment is disposed of properly

• Protective equipment is recycled when possible

• Protective equipment is reused when appropriate

• Protective equipment is repaired when needed

Help your organization reduce safety incidents, stay in compliance and transform safety culture.

DuPont Sustainable Solutions
LEARNING & DEVELOPMENT

Human Resources eLearning Training Curriculum

Version 1.0 (Rev. 1/2018)

CORPORATE DEVELOPMENT Corporate Development is the process of identifying, evaluating, and acquiring new businesses or assets that will enhance the company's long-term growth and profitability. This includes activities such as mergers and acquisitions, joint ventures, and strategic alliances.	EMPLOYEE RETENTION Employee retention is the process of keeping your best talent from leaving your organization. This involves creating a positive work environment, providing opportunities for growth and development, and offering competitive compensation and benefits.	COMMUNICATION SKILLS Communication skills are the abilities that enable individuals to effectively convey their thoughts, feelings, and information to others. This includes both verbal and non-verbal communication, as well as listening and problem-solving skills.	TEAM MANAGEMENT Team management is the process of leading, motivating, and coordinating a group of people to achieve common goals. This involves setting clear expectations, providing support and resources, and fostering a collaborative and positive team culture.	LEGAL ISSUES Legal issues are matters that involve the interpretation and application of laws and regulations. This includes areas such as contract law, labor law, and intellectual property law, which can have a significant impact on an organization's operations and compliance.
WORKPLACE VIOLENCE Workplace violence is a serious concern for many organizations, as it can result in physical harm, emotional distress, and financial loss. This involves understanding the signs and symptoms of workplace violence, as well as implementing effective prevention and response strategies.	RED-FLAG BEHAVIOR Red-flag behavior refers to actions or behaviors that indicate a potential risk or danger to an organization or its employees. This can include behaviors such as harassment, discrimination, and substance abuse, which require prompt attention and intervention.	CUSTOMER SERVICE SKILLS Customer service skills are the abilities that enable individuals to effectively interact with and serve customers. This includes skills such as active listening, problem-solving, and communication, which are essential for providing a positive customer experience.	MANAGEMENT Management is the process of planning, organizing, leading, and controlling an organization's resources to achieve its goals. This involves setting a vision, developing strategies, and implementing effective systems and processes to ensure the organization's success.	DATA SECURITY/PRIVACY Data security and privacy are critical concerns for organizations in the digital age, as they involve protecting sensitive information from unauthorized access, use, or disclosure. This requires implementing robust security measures and adhering to relevant laws and regulations.
		ETHICS Ethics refers to the principles and values that guide an individual's or organization's behavior. This includes concepts such as honesty, integrity, and fairness, which are essential for building trust and maintaining a positive reputation.	DIVERSITY Diversity refers to the presence of differences among individuals, such as race, ethnicity, gender, and age. Embracing diversity is important for organizations, as it can lead to increased creativity, innovation, and better decision-making.	SOCIAL MEDIA Social media refers to online platforms and applications that enable users to connect, share information, and interact with each other. This includes platforms such as Facebook, Twitter, and LinkedIn, which have become integral parts of many organizations' marketing and communication strategies.
