

Case Study.
Solar Energy Manufacturer.
Spain.
Renewable energy.

Safety: more than a word, a corporate commitment.

Context

dss+ client is a company in the renewable energy sector owned by a world renowned RE investor company. With several solar photovoltaic plants spread all over the world, it builds and operates the solar energy produced in these plants. With a business focus clearly directed towards fighting climate change, the development of more efficient and safer practices is a strategic pillar of the company and a stake in its long-term success.

Challenge

Due to the client's integration in the owner company's portfolio, the renewables company was motivated to reinforce its HSSE Management System in order to achieve a safer environment for its workers. With that goal, the client decided to further strengthen their commitment to workplace safety, and provide training to all of their staff.

Solution

The project included several activities related to the HSSE Management System. Firstly, some of the safety procedures were designed according to the operational requirements. Then, training sessions were defined and scheduled in order to ensure that all employees are familiar with safety procedures implemented on-site. Then, with dss+ support, the client started the implementation of some of the HSSE procedures to achieve the company's main goal of incorporating safety practices to ensure a safer environment for its workers.

Assignment

Reinforce the company's commitment to safety by re-designing its integrated HSSE Management System according to the client's HSSE requirements.

Offering

HSSE Management System, Redesign, implementation and training on the HSSE procedures

Impact

- Increasing Safety Operational Procedures to reinforce the Safety Management System.
- 100% of employees trained in the Safety Procedures

"We are very committed to continuous improvement in Safety, we are therefore fully dedicated to the design and implementation of the HSSE Management System in order to fulfill the company's requirements and achieve HSSE excellence."
